- PEHA: Aura
- ELSO: Joy
- Can be integrated in multiple-frames

The ideal partner:

The PROF series drives

### New design

As the successor to EC311, EC411 has a brand new design in line with Becker Centronic-II products. Stylish and equipped with versatile functions.

### Wireless comfort

Small signal yet large effect: The new wall-mounted transmitter can be integrated in the home automation system from Becker quickly and cost effectively. Your customers therefore have complete management and control of their homes at the push of a button from a central point.

### Energy saving

If your customers close their roller shutters at dusk, they can reduce their heating bills by up to 30%. And during the summer months, roller shutters help to keep rooms cool.
